

# ACOUSTICEL R-10 - Floating Floor Isolation For Timber Floors

## Key Benefits

- Produced from 95% recycled rubber
- Easy to cut and install
- Only 10mm thick
- PART E compliant
- Dramatically reduces footfall noise through a timber floor
- Supplied in a rolls 5m x 1m x 10mm thick

## Description

A recycled rubber soundproofing for floors engineered to reduce impact noise through a timber separated floor and specifically designed to help bring a timber suspended floor into Part E compliance for separating floors between new flats.

Independently tested, this acoustic insulation is the popular choice for all flat conversions and complies with the latest Building Regulation requirements.

This unique resilient mat is also ideal for soundproofing a floor in existing flats, homes and a wide variety of other domestic uses and should be used to create an independent floating floor to reduce impact and airborne noise nuisance.
